

# TABLE OF CONTENTS.

The sub-headings — without numbers — are not all included; cf. the alphabetical index at the end of the second part. — When an author's name is given within brackets, [ ], this indicates that the article by the author in question, appearing in the first edition of this work, has been revised and amplified for the present edition. — Next to the revising author, the responsibility for the revision of the older article falls, in most cases, on the editorial staff — generally on the Editor-in-Chief — without this being in every case specifically indicated. The same is true, to a certain extent with regard to the choice of the illustrations. For further particulars with regard to the authors, the assistant editors of the several sections, etc., see under the list of authors below.
